which are not available in certain countries. This manual is distributed internationally. It provides a general indication of the range of models, features, special equipment and/or colours available in various countries. Some of the models, features, special equipment and/or colours may not be available in your country, or may only be available in a different specification. Additionally some models, features, special equipment and/or colours may only be available in combination with others. For current and more specific information relating to the range of models, features, special equipment and/or colours available in your country, and their pricing, you should contact your nearest Mercedes-Benz Truck Dealer.

6x4LS Actros Air Suspended Truck Tractor Range.

Launch Edition: May 2018

Mercedes-Benz
Trucks you can trust

The New Mercedes-Benz Actros 6x4LS Range.

The New Mercedes-Benz Actros air suspended truck tractor range impresses not only with a comfortable driver workplace, but also with precisely coordinated, application-matched vehicle configurations, impressive fuel savings compared with its predecessor, efficient technology and attractive service offers which increases the overall effectiveness further still. Core Characterstics of the New Actros are Reliability, Efficiency and Safety.

Reliability. Operators who earn their money in road-bound goods transport need reliability. In other words: trucks they can count on. With the new Actros 6x4LS range we are able to offer you a vehicle incorporating the rich fund of experience and expertise acquired over more than 100 years of German engineering. Equipped with leading Mercedes-Benz vehicle technology and components tested under the toughest conditions. This applies to engines, transmissions and drive axles as well as frames, chassis, suspension and cabs. Everything is perfectly coordinated, in order to meet all requirements reliably, even in extreme conditions.

Efficiency. Mercedes-Benz trucks stand for particularly high economic efficiency worldwide. The new Actros 6x4LS range also meets the highest standards of efficiency, based first and foremost on its particularly low fuel consumption. Low wear and a higher resale value are additional merits contributing to its high overall economic efficiency. To this end, numerous innovative technical measures were implemented in the course of developing the new Actros range. These result in engines with higher performance and lower fuel consumption, a powertrain which enables a particularly economical driving style, and an aerodynamic design honed down to the finest details in the interest of fuel efficiency.

Safety. Mercedes-Benz employs many safety and assistance systems to reduce risks and ease the burden on the driver. Alongside the Electronic Braking System with ABS, ASR, hill holder and Active Brake Assist 4, the Stability Control Assist system, Lane Keeping Assist and Attention Assist help the driver to avoid or mitigate accidents. Also contributing to the high level of safety are the standard LED day-time running lights, LED tail-lights and flashing hazard warning lights under emergency braking.

StreamSpace L-cab, 2.50 m, level floor

The cab has been specially optimised for low fuel consumption. Thanks to its width and the headroom of 1.97 m between the seats, it offers plenty of space and a high level of comfort. The cab has been designed in accordance with the latest ergonomic and safety principles; the level floor facilitates through-cab access to the co-driver's side. **StreamSpace L-cab, 2.30 m.** The cab has been specially optimised for low fuel consumption. The cab has been designed in accordance with the latest ergonomic and safety principles and offers high levels of comfort and convenience.

Consumption. With fuel savings of up to 6% compared to its already fuel-efficient predecessor, the new Actros with its new 6-cylinder in-line engines is a particularly economical proposition. The new Actros comes with a choice of two powerful 6-cylinder in-line engines: the 12.8 liter OM 460 and the 12.8 liter OM 471 – both designed for low fuel consumption, maximum longevity and optimum performance.
